SEBASTIAN VILLARROEL

Game Programming Intern Candidate | Unreal Engine · Unity · C++ / C#

437-838-4287 | sebastian.gvg94@gmail.com | Mississauga, ON, Canada

linkedin.com/in/sebastian-villarroel-2243aa177/ | Freefall Project Page | Personal Portfolio

PROFILE

Game programming student at Humber Polytechnic with hands-on Unreal Engine and Unity development, backed by a professional software engineering background in production web applications. Led programming on Freefall, a multiplayer Unreal Engine project, owning gameplay, physics, and UI systems as tech design lead while directing version control for a mixed programmer/animator team. Comfortable across C++, C#, and Unreal/Unity workflows, with strong Git discipline and Agile team experience.

GAME DEVELOPMENT PROJECT

Freefall - Multiplayer Game (Unreal Engine) *4 months | Toronto, ON*

Tech Design Lead / Programming Lead

- Won 3rd place in the People's Choice Awards at Level Up Showcase 2026.
- Led programming direction as tech design lead on a team-based multiplayer game, working alongside a team of 3D animators to align technical implementation with creative and animation goals.
- Directed version control workflow for the team, managing branching and merges to keep the multiplayer build stable across contributors.

TECHNICAL SKILLS

Game Development: Unreal Engine (C++, Blueprints), Unity (C#), custom engine development (C++), gameplay systems, physics, UI implementation, multiplayer fundamentals, OpenGL, Vulkan, SDL.

Languages: C++, C#, JavaScript, TypeScript

Tools & Practices: Git/GitHub, Jira, Agile/Scrum, CI/CD pipelines, JetBrains IDEs, Figma, Agentic workflows

SOFTWARE ENGINEERING EXPERIENCE

Software Engineer at Apply Digital *Mar 2023 – Aug 2026 | Toronto, ON / Santiago, Chile*

- Built production UI and application logic across multiple enterprise client platforms, translating design specs into working, maintainable systems within Agile sprints.
- Oversaw and corrected AI agent-generated code, applying architectural judgment to fix logic and design gaps the AI missed before merging into production.

Senior Full-Stack Developer at Chek *Jul 2022 – Mar 2023 | Santiago, Chile*

- Developed a full user-lifecycle feature set for a fintech product, integrating third-party services end to end.

Full-Stack Developer at Reign *Oct 2020 – Jun 2022 | Santiago, Chile*

- Built and maintained systems for multiple clients and markets, collaborating across product, design, and engineering in Agile sprints.

Intern at Reign *Feb 2020 – March 2020 | Santiago, Chile*

- Built a dashboard system integrating with Jira Server API to calculate and visualize agile project metrics, supporting data-driven sprint reviews and retrospectives

Intern at Universidad Católica del Norte *Jul 2019 – Aug 2019 | Santiago, Chile*

- Optimized a predictive statistical model for the Academic Vice-rectory using machine learning, and built a web interface for academic data visualization and access.

EDUCATION

Humber Polytechnic - Advanced Diploma in Game Programming *2027 | Toronto, ON*
Universidad Católica del Norte - B.Eng. Computer Science and Engineering *2021 | Antofagasta, Chile*

LANGUAGES

English, Spanish
